PROFESSIONAL SUMMARY

Full Stack Developer (.NET + Angular) with 2+ years of experience building secure, scalable applications in the financial domain. Strong expertise in ASP.NET Core, Web API, C#, SQL Server, Angular, and Azure cloud services, with a proven ability to deliver clean, maintainable code for compliance-driven systems.

WORK EXPERIENCE

Apmosys Technology Pvt. Ltd.

Jan 2024 – Present

Role – Software Engineer

Navi Mumbai

- Full Stack Developer working on a **client-facing fraud management application** in the financial domain.
- Designed and optimized **backend services and SQL Server queries** to improve application scalability.
- Handled **authentication, bug fixes, and performance optimization** to ensure reliable and compliant systems.
- Implemented **AI-based enhancements** to improve application intelligence and operational efficiency.
- Ensured **on-time delivery of deliverables**, contributing to **high client satisfaction** and **positive feedback**.
- Worked in an **Agile/Scrum environment**, contributing to **sprint planning, daily stand-ups, and code reviews**.

PROJECTS

FRIP – Fraud Risk Intelligence Platform

Client: Bank of India

ASP.NET Core, Web API, C#, Angular, SQL Server, ML.NET, Azure

- Designed and developed a **fraud risk intelligence platform** to detect and monitor fraudulent transactions.
- Implemented **JWT-based authentication and authorization** for secure, role-based access control.
- Built a **real-time dashboard** displaying complaint IDs, transaction details, and actionable insights.
- Developed a **fund tracking module** to help banking authorities monitor transaction status and fund flow.
- Integrated with **core banking systems (Finacle)** to retrieve and analyze transaction data.
- Built an **ML.NET regression model** to analyze and identify high-risk fraudulent transactions.
- Enhanced the platform with **AI-powered features**, including a chatbot and natural language search.
- Collaborated with DevOps to ensure **smooth deployments** and resolve production issues.

PropConnect – Property Selling & Buyer Engagement Platform

ASP.NET Core, Web API, C#, Angular, SQL Server

- Contributing to the development of a **property selling platform** that enables buyers and sellers to interact seamlessly.
- Designed and implemented a **Visit Request Module** allowing buyers to send property visit requests to sellers, improving user engagement and interaction.
- Developed end-to-end workflows for **request creation, status tracking (Pending/Approved/Rejected), and notifications**.
- Built and integrated **RESTful APIs** for handling visit requests, ensuring efficient data flow between frontend and backend.
- Collaborated on implementing **JWT-based authentication and role-based authorization** to secure buyer-seller interactions.
- Optimized database operations using **SQL Server** for handling request data and user activity efficiently.
- Followed clean coding practices and participated in **modular and scalable system design**.

TECHNICAL SKILLS

Backend	C#, ASP.NET Core, Web API, ADO.NET, Entity Framework, ML.NET, AI Integration
Frontend	Angular, HTML , CSS ,Typescript
Database	Microsoft SQL Server
Cloud	Microsoft Azure (App Service, Storage, Application Insights, Service Bus, Key Vault, ARM)
Tools	GitHub, ChatGPT, GitHub Copilot, Postman, Swagger, Visual Studio, VS Code

EDUCATION

Trident Academy of Technology

Bhubaneswar, India

Bachelor of Technology (B.Tech) in Computer Science and Engineering (CSE)

CGPA: **8.2**

HONORS AND AWARDS

- **Round of Applause Award** — Recognized for **high-impact contributions** at **Apmosys Technology Pvt. Ltd.**
